

Googlewhack

Article Talk

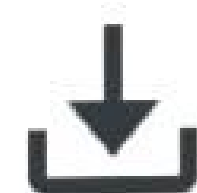

A **Googlewhack** is a contest to find a [Google Search](#) query that returns a single result. A Googlewhack must consist of two words found in a dictionary and is only considered legitimate if both of the search terms appear in the result.

Published googlewhacks are short-lived since when published to a website, the new number of hits will become at least two: one to the original hit found, and one to the publishing site.^[1]

Googlewhack

Article **Talk**

A **Googlewhack** is a contest to find a [Google Search](#) query that returns a single result. A Googlewhack must consist of two words found in a dictionary and is only considered legitimate if both of the search terms appear in the result. The term googlewhack, coined by Gary Stock, first appeared on the web at Blinking on 8 January 2002

Published googlewhacks are short-lived since when published to a website, the new number of hits will become at least two: one to the original hit found, and one to the publishing site.^[1]
